Who We Are

We deal in Health Hygiene Compostable & Biodegradable Tablewares like Bagasse products, Bamboo products, Paper-Kraft products, Corn Starch products, Areca Leaf products, Tissue Paper, Paper Straws, Food Wrapping Paper Rolls, Non-woven Fabric Bags.

We as a company have always believed in preserving nature and support green movement so that has inspired us to move forward. With our client-centric approach, we are committed to fulfil all demands of our clients in various industries. We have been able to attain a remarkable position in the market by making use of high-quality products, thus not only generating a larger client base but also a sustained customer base.

We ensure that the timely dispatch of the final products to our clients spread across the world as per their requirements and norms as we aim to attain highest client satisfaction.

PROTECTING OUR PLANET STARTS WITH US

ECO-FRIENDLY PRODUCTS

Our products are
not a burden to the
environment.

WEALTH OUT OF WASTE

We make full use of
nature that even a dry leaf
serves a purpose.

HAPPY PLANET

Care for the well-being of
planet with our
biodegradable products.

A Range of Eco-friendly food packaging Products

GREEN CREDENTIALS

We stay true to our commitments.

Eco Friendly

We advocate the use of packaging aimed to reduced CO² emissions and help preserve the environment by eliminate the consumption of single use plastic.

Renewable materials

All our packaging is made from readily recyclable paper board resources.

Recyclable

All our paperboard packaging can be easily reprocessed and reused to help limit waste.

Email : iravanoverseas@gmail.com | Website : www.iravanoverseas.com

BAGASSE

Food Service Disposables

Bagasse Vs. Plastic

- Plastic is not biodegradable and does not go away. Every piece of plastic ever made still exists today.
- 90% of the world's seabirds have fragments of plastic in their stomach.
- Only 9% of plastics are recycled around the world.
- It will take hundreds of years for a single piece of plastic to break down and then it will turn into toxic and dangerous microplastic.
- 80% of ocean's plastics originates on land. Then it enters our oceans through rivers and streams.
- 96% of all biodiversity potentially ingests plastics.
- The animals most vulnerable to the toxic effects of plastic contamination are those at the very top of the food chain - HUMANS!
- Avoiding plastic is a better solution than recycling as the plastic recycling is also carbon intensive.

Avoid Plastic

Only a tiny percentage is recycled

Leaches toxins into food & drinks

Made from fossil fuels

Will still be here in hundreds of years

Pollutes our oceans

Kills marine animals and birds

Enters our food chain

Causes hormone disruption & cancers

BAMBOO

Food Service Disposables

Bamboo fiber

Bamboo fiber, cellulose extracted from naturally growing bamboo, which contains a special component that is against bacterial and odor, it also absorbs moisture and good for health. After several technology processing then formed into a variety of products from small portion cups through to large catering trays.

This renewable and reclaimed resource is a strong alternative to traditional plastics or polystyrene.

Our complete bamboo fiber range is certified compostable and has the benefit of being breathable, cut and grease resistant and able to go in the microwave or oven, meaning your food stays hot and crispy.

We always recommend oven testing to ensure suitability for your operating conditions.

Performance Features

- Breathability keeps foods crisp
- Retains temperature
- Microwaveable and freezable
- Ovenable to 200° C for 40 minutes
- Hot and cold food friendly
- Grease and cut resistant
- Texture helps containers stack without sliding
- Won't melt and no liner needed - hot food can go straight in from the fryer
- Customizable - print or emboss
- Can be top sealed (subject to item shape)

Environmental Benefits

- Made with rapidly renewable resources
- Natural degradation in 90 days

DID YOU KNOW?

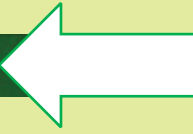

The bamboo plant is a fast growing and highly renewable resource, reaching maturity in about 9 months.

PAPER-KRAFT

Food Service Disposables

Paper

Paper is a very versatile material. It is produced from cellulosic, naturally renewable fibers. It is therefore considered as an environmentally friendly material, being easily recycled, composted or incinerated after use.

Kraft Paper

Kraft paper is the most used material in packaging. It is made by the sulfate pulping process. Kraft paper has immense strong properties that provide greater durability than other conventional packing materials. It can withstand industrial pressures, such as moisture and heat.

Difference between Regular paper and Kraft paper-

Kraft paper doesn't involve extensive bleaching, which decreases the paper's strength and increases manufacturing cost .

We Offers

IOPL offers a wide range of paper-kraft food packaging products to suit all your needs. Our paper-kraft bowls are perfect for soups, rice, salads, and side dishes, while our paper-kraft food boxes are great for take-out or food delivery. We also offer paper cups and lids for hot and cold beverages and a variety of paper packaging options for food items such as cookies, cakes, and pastries. Whether you're looking for disposable packaging or something more durable, we have the perfect solution. Paper-kraft is a recyclable and compostable material, so you can feel good about using our products, knowing they're not harming the environment.

Advantages of Paper-Kraft Food Packaging

- * Paper-Kraft is Durable and Resistant
- * Natural Look of Paper-Kraft
- * Enhanced Appearance
- * Eco-Friendly

CORN STARCH

Food Service Disposables

WHAT MAKES IT UNIQUE

This biodegradable collection is made from responsibly farmed natural cornstarch and biobased material. Featuring a wide range of disposable plates, cups, bowls and cutlery, it will start to biodegrade within 2 years*.

Cornstarch Features :

- 🌱 Disposable
- 🌱 Refrigerator and freezer safe
- 🌱 Hot and cold resistant
- 🌱 Durable and leak resistant

*Actual degradation times may vary depending on environmental conditions.

<u>Cornstarch Tableware</u>	<u>Plastic Tableware :</u>
Made from sustainable and fast growing crop	Product of Chemical processes that releases green house gases that causes climate change
Breakdown naturally under water, air and sunlight	Processing consumes lot of energy. Engineered to last
100% Biodegradable 100% Compostable	Non biodegradable
Lightweight, Durable, spill proof proving to be highly suitable for takeaways & deliveries	Some plastics contain harmful substances and not ideal for usage of food consumption
Usable temperature between 20°C to 120°C	Usable temperature between - 10°C to 100°C
Microwave and refrigerator safe	Not all plastics are microwave safe
Burning will not release toxic gases, ashes are non-toxic	Burning plastics produces toxic gases such as carbon monoxide, carbon dioxide causing environment pollution

ARECA

Food Service Disposables

WHAT IS ARECA ?

Areca palm leaf products are eco-friendly. They are an alternative to conventional disposable products. They are stylish, elegant & natural. The palm sheaths from the areca nut trees fall off. They fall off of the trees in a natural way, the trees aren't cut. After use, you may dispose of without polluting your environment. Because these are compostable palm leaf plates. They decompose 100% as natural leaves without harming mother nature.

Now a day the importance of biodegradable materials is very high since polyethylene wastes poses severe threat to the universe. The disposable plates and food packing materials manufactured from easily available areca nut palm leaves is a better substitute for disposable polythene plates. Several countries are trying to restrict the use of plastic materials and hence eco-friendly products are preferred over the plastic products.

Advantages of Areca Products

- Eco-friendly, Bio-degradable and Compostable
- No chopping down of trees, fallen leaves are collected and turned to VALUE ADDED PRODUCTS. 'Waste to Wealth' Concept.
- Light weight, Sturdy and Non-crushable.
- Microwave & Refrigerator Safe.
- Food plates thrown after eating will be naturally degraded within 60 days of time like any plant matter.
- Will increase work efficiency and resource optimization: Using Areca ware will save water and human efforts to wash utensils.
